SUMMARY

Statistician with experience in data consolidation, structuring, and analysis. Proficient in visualization tools such as **Power BI** and **advanced Excel**, with strong hands-on experience automating data collection and transformation routines using **Python** and **Power Automate**. Practical experience implementing **automated tests** and building **ETL pipelines** to ensure data integrity, supporting the structuring of **operational KPIs** and direct support for strategic decision-making.

EDUCATION

Bachelor's in Statistics
Universidade Federal do Rio Grande do Sul, UFRGS

Mar 2023 — Dec 2026
Porto Alegre, RS, Brazil

- **Focus areas:** Linear Algebra, Probability, Data Visualization, Machine Learning and Clustering.

PROFESSIONAL EXPERIENCE

Systems Analyst
Maxiforja Componentes Automotivos

Apr 2024 — Present
Canoas, RS, Brazil

- Built data extraction, transformation and consolidation pipelines (**ETL**) with **Progress** and **Python** from multiple sources, serving as the foundation for **Power BI** dashboards used in corporate and operational KPI analysis;
- Created automated routines to generate advanced reports directly in **Excel**, cutting analysis processing time by up to 50%;
- Implemented logical validation and input-sanitization routines in the ERP, ensuring consistency and high integrity of the managerial information reported to leadership;

Progress Developer | TOTVS Datasul ERP
Maxiforja Componentes Automotivos

Jan 2022 — Nov 2023
Canoas, RS, Brazil

- Implemented automated tests for system routines, focusing on identifying quality bottlenecks, reducing errors and shortening deployment time;
- Performed **automation of data collection and processing tasks** using **Python** and **Power Automate**, turning multi-day routines into workflows of just a few minutes;
- Developed ERP extensions and integrations using Progress ABL, controlling access to corporate information and reducing inefficiencies in manual processes.

ADDITIONAL ACTIVITIES

- Delivered analytical presentations at academic forums and events, translating complex information and findings visually for external audiences;
- Volunteered with the IFRS Contribui project, providing logistical support and decision-making guidance for micro and small business owners.

SKILLS

- **Analysis & Visualization:** Power BI, Advanced Excel, Tableau, KPI structuring and consolidation;
- **Languages & Automation:** Python (pandas, scikit-learn), Power Automate, R, SQL, Julia, Progress ABL;
- **Tools:** Git, Linux, Docker, operational data governance, complex systems integration and quality testing;
- **Languages:** Advanced English, Intermediate Spanish.
