SUMMARY

Statistics student with hands-on experience in data consolidation, structuring, and analysis across ERP and BI environments. Curious and adaptable, with a track record of automating workflows using **Python** and **Power Automate**, and building **ETL pipelines** and **automated tests** to keep data reliable end to end. Comfortable moving between technical and business-facing work, and motivated to bring that versatility to cross-functional, AI-driven teams.

EDUCATION

Bachelor's in Statistics Mar 2023 — Dec 2026
Universidade Federal do Rio Grande do Sul, UFRGS *Porto Alegre, RS, Brazil*

- **Focus areas:** Linear Algebra, Probability, Data Visualization, Machine Learning and Clustering.
- **Undergraduate Thesis:** Applying bayesian machine learning algorithms to a recommendation system.

PROFESSIONAL EXPERIENCE

Systems Analyst Apr 2024 — Aug 2026
Maxiforja Componentes Automotivos *Canoas, RS, Brazil*

- Built **ETL pipelines (Progress, Python)** consolidating data from multiple sources for corporate and operational KPI analysis;
- Built ERP input-validation routines, cutting data-entry errors by 30% in reports used by leadership;
- Maintained and extended Progress ABL customizations in the ERP, combining hands-on development with the analytics work above;

Progress Developer | TOTVS Datasul ERP Jan 2022 — Nov 2023
Maxiforja Componentes Automotivos *Canoas, RS, Brazil*

- Wrote automated tests covering 40+ ERP routines, reducing errors and shortening deployment time;
- Automated data-collection workflows (**Python, Power Automate**), turning multi-day routines into workflows of just a few minutes;
- Built numerous ERP integrations in **Progress ABL** across multiple departments, removing an estimated 50h/month of manual work.

ADDITIONAL ACTIVITIES

- Delivered analytical presentations at academic forums and events, translating complex findings into clear, accessible visuals for non-technical audiences;
- Volunteered with the IFRS Contribui project, providing logistics support and data-informed guidance to micro and small business owners.

SKILLS

- **Analysis & Visualization:** Power BI, Advanced Excel, Tableau, KPI structuring and consolidation;
- **Data & Automation:** Python (pandas, scikit-learn), Power Automate, R, SQL, Julia, Progress ABL;
- **Tools & Practices:** Git, Linux, Docker, operational data governance, systems integration, automated testing;
- **Languages:** Advanced English, Intermediate Spanish.
